

# FLOW = ACCESS

Applying flow strategies to maximize patient & resident access to appropriate care.

We have certain Ministry/Health Authority targets that are used to measure how effectively and efficiently we are moving our patients and residents through the system, from admittance to community transition.

When we do this work well and meet these targets, we positively impact patient care, our work environment, and the organization's financial health.

These incentivized targets are called "P4P" or "Pay for Performance."

Stay tuned for next week where we share more information about our P4P targets and how they help us to provide exceptional quality care to our patients and residents.
