

FLOW = ACCESS

Applying flow strategies to maximize patient & resident access to appropriate care.

Effective and efficient team care – or you might know it as “rounding” (or icare rounds) – is at the heart of our discharge-planning process.

In times of busyness, having command of our fundamentals is our way forward.

Some of these fundamentals include:

- Making sure patients’ care plans are filled in.
- Having an estimated discharge date (EDD) in place for each patient.
- Asking the 5 consistent questions that should be discussed in each morning round. *Need a refresher on these questions? Check out the link below!*

If you’d like additional training or are having issues executing on any of these team care practices, please talk with your manager.
