

FLOW = ACCESS

Applying flow strategies to maximize patient & resident access to appropriate care.

It's that time of year again.

We experience some of our largest issues with congestion following the Labour Day long weekend, meaning that we can safely anticipate some challenges in that period with placing full operating-room slates and clinic schedules.

We shared a similar message around this time last year, and have opted to repeat it again because it can't be emphasized enough: our best way to mitigate the congestion we inevitably know is coming is to prepare for it.

In the lead-up to next weekend, preparation and diligence when it comes to our flow best practice will set us up to be in a good place heading into a busy stretch, and ensure we're maximizing patient and resident access to appropriate care.

Win-win!
