

FLOW = ACCESS

Applying flow strategies to maximize patient & resident access to appropriate care.

We talk a lot about good flow practices at PHC.

A lot goes into transitioning people into the appropriate setting to receive optimal care.

It can be a lot of information to stay on top of, especially at times when it feels particularly busy. And when it does feel particularly busy, the last thing we want is for you to not be able to find the most up-to-date flow tools and protocols.

While we've always had a webpage on the Leaders Resource Centre website, we're excited to let you know that we also now have a presence on PHC Connect for easy bookmarking when you're at a PHC workstation.

You can find it on the intranet under "Flow/Access" in the "Program and Services" category, or by using the link below.
